UNIT 6.1 GRADED ASSIGNMENT

Task:

1. Create a new Jira instance: <https://www.atlassian.com/software/jira/free>
2. Add a new scrum project
3. Add some epics, stories and tasks to the project backlog
4. Estimate the stories and tasks
5. Create a team and invite some teammates.
6. Add a 2-week sprint and start it.
7. Plan the sprint: move some items from the backlog, assign them to the teammates.
8. Add 1-2 new columns to the sprint board.
9. Group the items by epic.
10. Move items between the columns and observe their statuses.
11. Check the project insights when at least one item is done
12. Take screenshots of the board and backlog views.

Solution:

After creating a new Jira instance, we created a new project named Ecommerce website and then added epics, stories and tasks to the project backlog.

1. Add some epics, stories and tasks to the project backlog

Insights

The screenshot shows a Jira board with a Kanban workflow. The board is divided into three main columns: 'To Do', 'In Progress', and 'Done'. The 'To Do' column contains three items: 'EW-1 User Authentication', 'EW-10 Content Management', and 'EW-17 Blog Functionality'. The 'In Progress' column is currently empty. The 'Done' column contains a large number of completed items, including 'EW-18 User Authentication', 'EW-19 Content Management', and 'EW-20 Blog Functionality'. A 'View settings' link is visible in the top right corner.
